Engage 3.0

- ✔ Design, display and maintain customized messages
- ✔ Minimize time for content creation and deployment
- ✔ Display any content on multiple monitors
- ✔ Schedule templates for any time or day

Engage 3.0

LEADER
IN DIGITAL SIGNAGE

Engage is a content creation program that allows users to easily create digital signage pages, playlists, personalized messages and advertising content to be displayed on monitors throughout the facility. There are unlimited creative options using our customization features within the solution. Users now have the ability to create content using images, weather, news, local traffic and short videos.

Engage is a web-based solution, allowing you to access your system from any browser or any device. Users have maximum flexibility managing one or hundreds of displays remotely or locally.

Once the content has been created, it can be uploaded into playlists that show in real time or on a future date. Engage allows you to choose what content will be displayed on any monitor within the system. It also allows you to choose the schedule in which you would like your messages to be shown. This solution focuses on the user experience and functionality, ensuring that anyone can create effective and informative visual messages to help direct travelers.

FEATURES

- Supports segmented or split screen customization
- Easy page customization using template, theme, layout format
- Display News, Health, Sports, Local Traffic, and Entertainment video shorts
- Display Twitter feeds or photo trivia
